Lipson/ Calif.
Assembly

TX
RC
RO

DEC 14 1969

A favor?

Could you brief me on current initiatives
in the Legislature on

- 1) Removing Lead from gasoline
- 2) "taxing" pollution -- e.g. a fee for
the use of the environment. I read recent-
ly about (and would be interested in the
specifics of) a proposal by Assemblyman
? to tax autos on a sliding
scale related to their emission.
- 3) why not tax lead in gas. This would en-
courage a less convulsive switchover to
other ways of getting sufficient octane
rating, and by the same token could probably
be pushed through that much more quickly.
- 4) any legislative work related to the issues
of the enclosed column? *

Sincerely,
